# PROJECT MANAGEMENT

AT TBAT we have the experience and capability to establish a sustainable project management approach within your company to ensure the smooth progression of your developments.

Whether you have been awarded a grant and require assistance in your next step or need the various elements of your project to converge to arrive at completion. TBAT Project Management can assist.

- Effective second stage planning strategy
- Professional, comprehensive completion of competition documentation
- Relationship management with awarding bodies
- Attendance and facilitation of project meetings both internal and review
- Implementing sustainable methods of tracking project progress
- Effective project scoping from the offset or to aid plan recovery

## WHY TBAT?

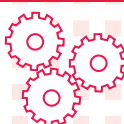

Our Project Management team has extensive skillset and profuse knowledge and experience across several industrial sectors and through a multiple of applications.

## WE CAN ADD VALUE THROUGH

- Experience – Multiple projects assisted across a range of funding environments
- Professionalism – An open and honest approach to work, attention to detail and friendly approach
- Support – Alignment to internal processes and advice in areas of difficulty and technical expertise
- Flexibility – Switch our support on/off when you feel we are adding value to your process
- Tools – Experience and learning through six sigma processes and Microsoft Project (if required)

# CASE STUDIES

1

## Innovate UK SMART Grant Award: Development of Prototype Project Value – £545K

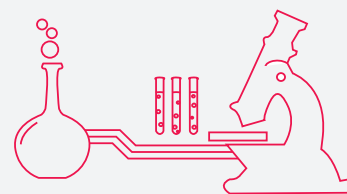

A global supplier of medical procedure information led a project to support the NHS strategy of becoming a paperless system. TBAT assistance delivered quarterly presentations and reports on project progress. Financial planning, forecasting and resource management were strongly supported as were negotiations with key subcontractors. A strong and reliable bond was developed with the awarding body as a result.

2

## Innovate UK – Feasibility Study: Formulated Products Project Value – £134K

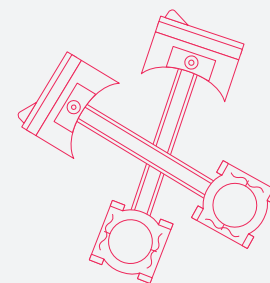

The single-company led project in automotive engineering was supported throughout the lifetime of the project. TBAT helped through generating progress reports, project planning and re-planning exercises. TBAT also conducted a necessary request for an extension to the project that delivered results beyond the original scope but within the same budget.

3

## Advanced Propulsion Centre – Low Carbon Technologies Project Value – £9.87m

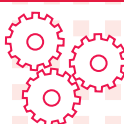

This 6 partner consortium were awarded funding from the APC competition for a collaborative R&D project. TBAT initially assisted in establishing the necessary planning material to get the project underway. A complex review and claim process was also supported. TBAT were contracted as Project Manager for one of the project partners, instilling risk management processes and action lists. The project plan was maintained and reviewed and deliverable audits were carried out before reporting progress to the overall Project Manager.
